

THE GARDEN STUDIO COLLECTION 2011

Crane Sheds and Summerhouses is a family run business, making timber buildings in Norfolk for over 35 years. We are proud to acknowledge that much of our trade is built around our reputation. We firmly believe that this is because we provide a personal service from design stage to installation, where the customer always comes first and is delighted with their building.

Our buildings are exceptional and unrivalled. We source the best quality timber and materials for every stage of our building process right down to the paint systems we use.

We employ skilled craftsmen and a well regarded installation team to finish your building to the very highest of our expected standards.

Our bespoke service means that you can have the building you desire to suit your requirements.

THE GARDEN STUDIO COLLECTION

The Burnham

The Langham

The Salthouse

The Binham

If you work or study at home or indeed have a hobby that requires that extra space, a separate building in your garden can be the answer (and isn't it nice to escape from the house into the garden). An Office or Studio in your garden can look stunning, it relieves any pressure of space in your household and the garden undoubtedly provides a more inspiring, quiet and relaxing environment in which to work, study or pursue your hobby.

Lots of light flooding in will keep you inspired and make for more pleasant working conditions.

We introduce our Studio Range, inspired by design but as always finished to the highest possible standards. All our studios are well ventilated, double glazed, lined and insulated for year-round use, built in very high quality FSC shiplap, painted with our fantastic Valtti paint system for a very low redecoration cycle, finished with solid brass fittings and a secure 5 lever mortice lock. Each building is made bespoke to order and so tailored to meet your exact requirements.

Just pick your style and requirements.

The Salthouse

A contemporary style studio.

With its pent roof, it has been designed for a modern workspace; the Salthouse Studio affords maximum light with its fully glazed walls and with its high performance insulation and double glazing provides a perfect year-round office, gym or studio.

Finished to an exceptional standard.

Features

Handmade to order in our Norfolk workshop

Delivered and installed in your garden

Crafted from high quality (FSC-certified timber) Redwood grown in North Sweden

Designed to meet modern planning requirements

Fully insulated including roof, walls and floor

Internal vertical matchboard lining

Toughened double glazed glass for durability

Fully glazed W75 x H190cm door, fully glazed front elevation and a fully glazed panel along each side to allow for maximum light. There is also a glazed opening window at the rear of the building to allow for ventilation

Five lever mortice lock and lockable window fittings for added security

Solid brass fittings

Extreme wear heavy duty roofing felt

Valtti paint system in a choice of colours

Available Options

Double doors

Extra window set

Guttering

Lacquered floor

Electrical pack (and heater)

Internally painted walls

Optional eave heights

Sedum green roof

Building Sizes

1.8 x 2.4m (6 x 8ft) to 6.0 x 6.0m (20 x 20ft)

The Garden Studio Collection | Crane Sheds and Summerhouses

The Burnham

The Burnham Studio brings together the light benefits of fully glazed walls with a more traditional style building; having a pitched roof, which creates extra height.

A beautiful asset to any garden, combining timber and glass to provide your perfect workspace or hobby room. Open and airy (fitted with air vents to the rear) and finished to our unsurpassed standards, our high grade insulation and double glazing makes it a studio for all seasons.

Available Options

- Double doors
- Extra window set
- Guttering
- Lacquered floor
- Electrical pack (and heater)
- Internally painted walls
- Velux window
- Cedar shingles
- Slate effect tiles

Timber

We are an FSC accredited company and we partner a timber mill in North Sweden who is also FSC accredited thus ensuring a constant supply of high quality certified timber.

We use Scots Pine that is sourced from an area of forest that has often been growing for more than 130 years at latitudes above 65° North. In these conditions the trees are slowly grown making the timber more dense which ensures a high quality, close grain less susceptible to dead knots.

The mill manages their forests in a sustainable way, replanting each tree.

All of this cut timber is then independently (VMF) inspected, classified and stamped to ensure traceability and quality.

After the timber is sawn into workable pieces, it is kilned to achieve the required moisture content. Crane Sheds and Summerhouses need the moisture content for external British conditions and so that the timber marry's perfectly with our paint systems. Having such close links with the mill ensures our standards are met.

When ready the timber is then sent directly to us from the mill. It is not sitting on docks or waiting (and deteriorating) for transportation by other companies.

The timber mill produces no waste or landfill, every part of the tree is used.

90% of waste produced at our workshops is timber which is used to fuel our heating system (thereby not using fossil fuels). The remaining waste that we produce is back sorted for recycling.

By buying our buildings you can be assured that not only is the timber of the best possible quality but also that along the way you have supported good forestry practice and sound environmental responsibility.

The Langham

A traditional studio or office with $\frac{3}{4}$ length windows and glazing of the door. Each of the 3 double sets of windows that are installed with the Langham Studio comes with 1 half as an opening window with a lockable catch for maximising air flow.

The Langham will suit and add value to any garden and as with all our studios, the Langham is a year-round room, providing work or hobby space away from the home.

Features

Handmade to order in our Norfolk workshop

Delivered and installed in your garden

Crafted from high quality (FSC-certified timber) Redwood grown in North Sweden

Designed to meet modern planning requirements

Fully insulated including roof, walls and floor

Building Sizes

1.8 x 2.4m (6 x 8ft) to 6.0 x 6.0m (20 x 20ft)

The Garden Studio Collection | Crane Sheds and Summerhouses

The Binham

Very much a traditional design, having a pitched roof with the door in the gable end, complimented with a very attractive roof overhang. Lots of ventilation through the many opening windows. The Binham is a pretty studio with the added value of being a year-round building with our high grade lining and insulation and finished off to our uniquely high standard.

Simply measure the space you have and we will do the rest.

The Garden Studio Collection | Crane Sheds and Summerhouses

Lining and Insulation

To create the perfect all-season retreat, enhance the finish of your Garden Studio as well as increase comfort and decrease noise levels we line and insulate your building.

We start by lining your building with a breathable paper membrane trapped between the studwork which acts as a moisture trap. We go on to fill the cavity with insulation. We then internally clad your Studio.

Matchboarding - Cladding of 15mm tongue and groove matchboarding giving a very attractive natural finish. It provides a robust and hardwearing finish suitable to hang shelves and hooks etc where required. This is included in the price of your building.

Painted Matchboarding - We use a channelled secret-nailed 15mm tongue and groove matchboarding. We apply a primer and then 2 top coats giving a satin ivory finish. This achieves a clean, bright look and feel to your room and has the same robust and hardwearing qualities. This is an available option.

Roof Coverings

We offer a variety of roof coverings to enhance your Studio. Your choice can add longevity to your building, reduce maintenance and compliment your surroundings.

Cedar Shingles

We use only the finest quality Canadian Blue Label Cedar Shingles expertly tiled by our own skilled craftsmen to give a traditional finish which will 'silver' with age. They are expected to last 35 years.

Slate Effect

These individually laid composite slates finally bring nature and technology together providing the ultimate protection against UV rays, wind, hail and fire. This roofing product carries a 50 year limited warranty. Opt for a more traditional grey or terracotta which looks great with the lighter paint shades.

Electric Pack

Light up your Summerhouse and use appliances by installing our electric pack. Professionally fitted by qualified electricians. Internal wiring will be fitted behind any lining.

The electric pack includes:

- 1 Insulated consumer unit
 - 4 Double sockets
 - 1 External double socket
 - 1 3 Spot chrome light fitting
 - 1 Single 1 way light switch
- An option of fitting a 2 kilowatt heater is available

Delivery and Installation

Our experienced and professional fitters deliver and install all our buildings free of charge.

As our business is very much dependant on our reputation in providing an excellent product and service our customer care is exceedingly important to us and you will find that we very much pride ourselves on this. From design stage through to installation providing the best possible service is our number one priority.

Joinery

Within our workshops we house our own Joinery works. Skilled carpenters make the doors and windows for all the buildings we produce. This ensures that the quality we demand is met. Being able to make bespoke doors and windows means that we can make them to suit our customers' requirements as many of the buildings we make are individually designed.

Our years of experience have taught us that buying in windows and doors is not ideal as they never fit quite as well as our high standards demand. Having total control over the quality and finish of our buildings is of prime importance to us.

Our Studio doors are double doors joinery made by us. They are constructed from hemlock, which is a timber particularly suitable for doors as apart from being durable it is far less susceptible to movement and warping than other timbers traditionally used for doors.

SPECIFICATION

Every material and component that we use and make is sourced and manufactured to the very highest standards. You will not find better quality anywhere. Crane Sheds and Summerhouses are market leaders in producing exceptional quality timber buildings. Our name is synonymous with strength, design and personal service.

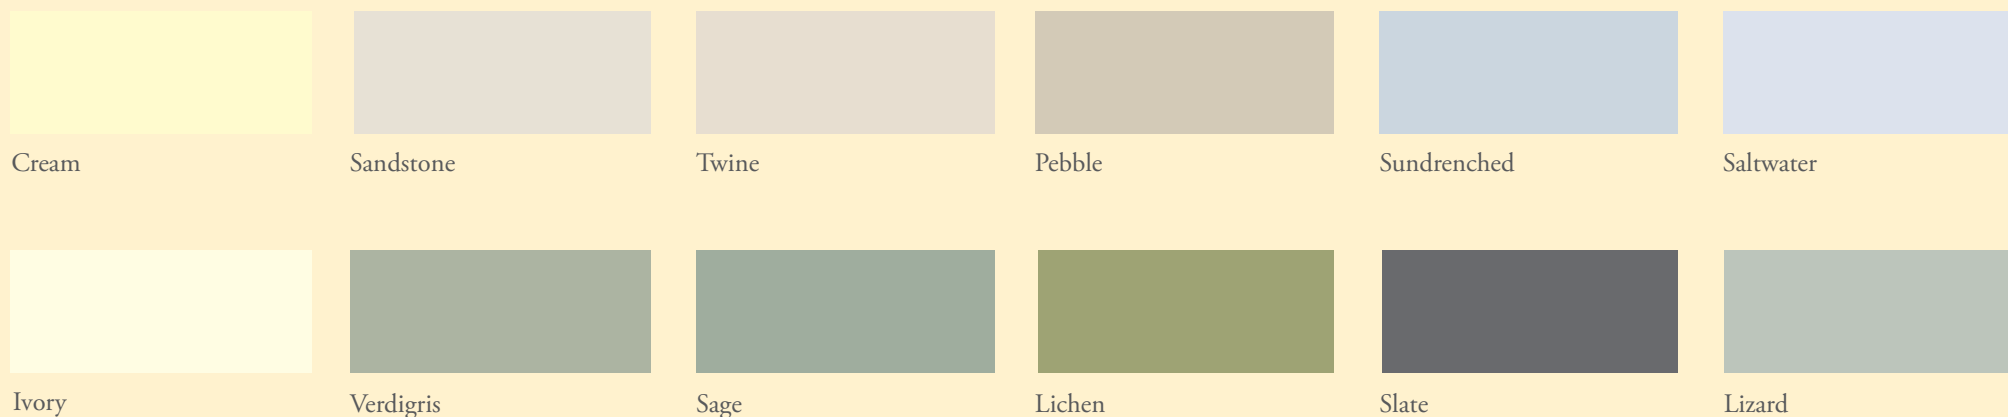

Side Walls	ex 19 x 125mm shiplap cladding on ex 38 x 75mm planed framing.
Door	Half-glazed/fully glazed, joinery-made door Single door 1900 x 750mm (high x wide) Double door 1900 x 1350mm (high x wide)

Roof	ex 19 x 125mm tongue and groove match boarding, on ex 38 x 75mm planed framing covered with 35kg heavy duty roof felt.
Lining & Insulation	The building comes fully insulated; walls, roof and floor. Also a breathable membrane is placed between the outer cladding and the framework. The building is internally lined with 15mm vertical matchboard cladding, the internal walls can be painted.
Paint Systems	Valtti paint system.

COLOUR PALETTE

Valtti

Inspired by nature and the soft neutral tones of traditional colonial buildings our extensive colour range is offered in best quality, weather resistant Valtti paint. This four coat system has been proved to be the best possible protection for exterior timber. Valtti is fully opaque and will enhance any building giving an exceptionally durable, low maintenance solid finish.

If our colours do not compliment your surroundings it is possible to match any colour at an extra charge.

This colour chart is designed to provide an indication of the colours in our palette. It cannot be taken as an exact replication of colour. However, we are happy to send out colour samples.
